INTERNAL · FOUNDER ONLY

Delivery Playbook

How to deliver every LocalBoost package from A to Z: what you do, what the bots do, and exactly what you must review before anything reaches a client.

For
Abdulelah (founder)

Packages
Get Found · Get Chosen · Stay Current

Version
8 Nov 2026

CONTENTS

What's inside

Read Part 0 once. Then use the part for the package you're delivering as a step-by-step checklist.

0	Before any delivery: rules, start gate, roles, tools	All packages
1	Get Found · 900 · خلّهم يلقونك SAR	A → K
2	Get Chosen · 2,200 · خلّهم يختارونك SAR	A → L
3	Stay Current · 299 · خلّك محدّث SAR / month	Monthly cycle
3B	Shop Check · 3,300 · زيارة التقييم SAR (one visit)	S·A → S·H
3C	Monthly Care · 1,700 · المتابعة الشهرية SAR / month	Monthly cycle
4	Final review: the “before you press Deliver” gate	All packages
5	Message templates (Arabic, ready to send)	Copy & paste
6	When things go wrong	Fixes & escalation

How to read the step labels

YOU only you can do it (approval, payment, publishing, client calls) BOTS Grok team or Claude prepares it CLIENT the shop owner must do it

Targets in this playbook are working targets, not promises to clients. Never promise a client a date that isn't written in their proposal.

PART 0

Before any delivery

These rules and the start gate apply to every package. If one item fails, you don't start.

0.1 The eight non-negotiable rules

#	Rule	Why it matters
1	**No work before payment is confirmed in your bank app.**	A screenshot from the client is not payment. Only you mark Finance → “Confirmed by founder”.
2	**Nothing goes live without written client approval.**	Save the approval (WhatsApp/email screenshot) in 04-evidence. No approval = no publish.
3	**Client owns every account. You are a Manager, never an Owner.**	Never ask for or store passwords or 2FA codes. Domains are registered in the client's name.
4	**Only use facts the client gave you.**	Hours, prices, services, phone: from the intake only. Unknown = ask, never guess.
5	**No guarantees, no fake reviews, no keyword-stuffed names.**	Breaking Google's rules can get the client's profile suspended. That ends the relationship.
6	**One scope, in writing.**	Anything not in the proposal is a new decision: price it or decline it. No silent freebies.
7	**Log it or it didn't happen.**	Every status change goes in the CRM Log tab with a reason. Evidence goes in Drive.
8	**Customers' privacy and the shop's money data are off limits.**	Photos inside a shop only with the owner's written permission, never customers' faces. Never ask for accounting, sales or bank data. Every money example says «مثال حسابي، مو وعد».

0.2 The start gate: tick all before Day 1

- [ ] Proposal sent and accepted in writing (“موافق”) and saved
- [ ] Payment received and **confirmed by you** in the bank app; Finance row = Confirmed by founder
- [ ] Customer ID (`LB-C-...`) and Project ID (`LB-P-...`) created; Project status = **Onboarding**
- [ ] Drive folder created: `LocalBoost/Customers/LB-C-.../` with `01-intake · 02-drafts · 03-final · 04-evidence`
- [ ] Onboarding form sent; all required fields received (name, Maps link, phone, WhatsApp, hours, services, photos, consent tick)
- [ ] Google Business Profile **Manager** access granted to the LocalBoost email
- [ ] BEFORE screenshots taken (see 1·C) and saved in 04-evidence
- [ ] Target date written in the Projects tab, matching the proposal

0.3 Who does what

Role	Does	Never does
You	Approve proposals & messages, confirm payments, final review, publish/apply changes (or approve them), talk to the client when it matters	Skip the review gate because you're busy
Delivery coordinator (Grok)	Creates records, sends approved messages, chases intake, files evidence, updates statuses	Promises dates, applies changes without both approvals
Claude (production)	Writes descriptions, services, reply drafts, QR card text, websites, proposals, reports from the intake	Invents facts; contacts clients; publishes
Quality controller (Grok)	Runs the QA checklist and returns PASS / FAIL with numbered fixes	Fixes work itself
Hadi (Grok)	Daily brief, capacity (max 2 active projects), renewals, weekly scorecard	Counts unconfirmed money

0.4 Tools you need ready

- **LocalBoost Google account** (business email). This is the account clients add as Manager.
- **Phone with Google Maps**, for checking what customers really see and taking screenshots.
- **business.google.com**, or Google Search/Maps → "Edit profile", signed in as LocalBoost.
- **Google Drive + the LocalBoost CRM sheet**.
- **Claude**, the LocalBoost Production project, with the `H5 PRODUCTION` handoff.
- **A QR generator** (any free one) and a simple design tool for the QR card.
- For Get Chosen: **a domain registrar** and **hosting** (GitHub Pages or another static host works).

Google changes its menus often

Button names in this playbook ("Edit profile", "Special hours", "Ask for reviews") can move or be renamed. If you can't find one, search the setting name in Google Business Profile Help. Don't improvise around a missing setting.

PART 1

Get Found · خلّهم يلقونك

900 SAR one-time (launch 750 for the first 1–2 clients). A complete, accurate, easy-to-contact Google Maps profile.

What the client receives

- Correct primary and secondary categories, and an accurate pin
- Hours for every day, plus Ramadan and Eid special hours (when provided)
- Services/menu with clear descriptions (and prices if the client wants them shown)
- A clear Saudi-Arabic business description (≤ 750 characters)
- Photos ordered: logo, cover, exterior, interior, work, team
- Call button (phone) and WhatsApp contact
- Review link + printable QR card
- Review-reply drafts (posted only after approval)
- Before/after screenshots and a short walkthrough

Working target: about 3–5 working days from complete intake, depending on how fast the client replies. Google can take extra days to show some edits.

1·A · Kickoff YOU BOTS

Delivery coordinator sends the kickoff message (template 5·1) **after you approve it**, plus the onboarding form link and manager-invite steps.

1·B · Intake + Manager access CLIENT BOTS

- Client fills in the onboarding form and adds the LocalBoost email as **Manager** (not Owner).
- Coordinator chases missing items once every 2 working days, max 3 reminders, then escalates to you.
- **Check verification:** if the profile is unclaimed or unverified, the **owner** must claim/verify it (Google may ask for a video or other method). Pause the project and explain. Don't verify on their behalf without them present.

1·C · Audit + BEFORE screenshots BOTS YOU

On a phone, signed out (or in incognito), search the shop the way a customer would and capture:

- The search/Maps result card
- Overview tab (hours, phone, buttons)
- About/description
- Photos tab
- Reviews tab (count, rating, replies)
- The pin location on the map

Save them as `04-evidence/before-01.png ...` and note every gap in the Audits tab.

1·D · Production BOTS

Coordinator sends Claude the `H5 PRODUCTION` handoff with the intake data only. Claude returns:

- Description in Arabic (≤ 750 chars; no links, phone numbers, prices, promotions or superlatives)
- Category recommendation (primary + up to a few relevant secondary ones) with reasons
- Services list with short descriptions
- Hours table + Ramadan/Eid special-hours plan
- Photo checklist (what's missing)
- QR card text, e.g. «رأيك يهمنا — امسح الكود وقيّم تجربتك»
- Reply drafts for real existing reviews
- A list: “MISSING — needs customer input”

1·E · QC review BOTS

The Quality controller runs `templates/qa-checklist.md`. Any FAIL goes back to Claude with the `H7 FIX` prompt (fix only the listed items). Repeat until PASS.

1·F · Your review YOU

Run the Get Found checklist in **Part 4** on the drafts. You're the last line of defence.

1·G · Client approval CLIENT YOU

Send **one** clear summary of every change (template 5·3). Wait for a written “موافق”. Save it in 04-evidence and record the date in Projects. Status → **Approved**.

1·H · Apply the changes in Google Business Profile YOU

Signed in as LocalBoost (Manager) → open the profile → **Edit profile**. Work top to bottom:

Section	What to do	Watch out
Business name	Exactly the real-world name on the sign	Never add keywords or locations (“best barber Narjis”). This can get the profile suspended.
Category	Set the primary category; add only truly relevant secondary ones	Primary category matters most; don't add unrelated ones
Description	Paste the approved Arabic text	≤ 750 chars; no URLs or phone numbers
Location	Check the pin; move it to the real entrance if needed	Address edits may trigger re-verification
Contact	Phone number; website if any; WhatsApp if the editor offers a chat/WhatsApp option	If there's no WhatsApp option, make sure the listed phone is the WhatsApp number and say so in the handover
Hours	Regular hours for all 7 days, then **Special hours** for Ramadan/Eid dates	Special hours are per date: enter the real dates
Services / Menu	Add each service with its description (price only if approved)	Match the intake exactly
Photos	Upload logo, cover, exterior with sign, interior, work, team	Real, owner-approved photos only; no stock images, no heavy text overlays
Reviews	Post **only approved** reply drafts	Never reveal private customer details in a reply

Review link: use the profile's “Ask for reviews” / “Get more reviews” option to copy the review link → make a QR code from it → put it on the card (logo + «رأيك يهمنا» + QR). Test it on your phone: it must open the review box for **this** business.

Some edits show “under review” or take a few days to appear. Note that in the Log and re-check in step 1·I.

1·I · After-check (24–72 hours later) YOU BOTS

Search again on a phone, the same way as in 1·C. Confirm every edit is live, take AFTER screenshots from the same angles (`after-01.png ...`), and call the listed number to confirm it rings. If Google rejected or changed something, see Part 6.

1·J · Handover YOU BOTS

- Send the handover message (template 5·4) with: the QR card (PDF + PNG), before/after images, and a 3-point walkthrough (how to reply to a review, how to change hours, how to add a photo).
- Remind them: everything is in their name; they can remove the LocalBoost manager at any time.
- Offer Stay Current **once**. No pressure follow-ups.

1·K · Close BOTS

- Projects → **Delivered** with the date; Deliverables rows filled in (links, QA = Pass, approval date).
- Day 7: one feedback message (template 5·5).
- If they bought Stay Current: Hadi creates the Recurring row (Part 3).

PART 2

Get Chosen · خلّهم يختارونك

2,200 SAR one-time + domain/hosting at cost. Everything in Get Found, plus a simple mobile-first website in the client's name.

What the client receives

- Everything in Part 1 (do all of steps 1·A → 1·K)
- A mobile-first website, Arabic by default (bilingual only if agreed in the proposal)
- Up to about 4 sections: Home, About, Services, Menu/Prices
- WhatsApp click-to-chat, call button and embedded map
- Their own domain and hosting, registered in **their** name, at cost
- The website link added to their Google Business Profile

Working target: the timeline is written in the proposal. Work in parallel: the Maps profile track (Part 1) and the website track below.

2·A · Lock the scope in writing YOU

- Sections (max ~4), languages, the template (café/restaurant · professional services/clinic · retail shop), domain name.
- Write the exclusions in the proposal: no online ordering, bookings, payments, blog, or ongoing content edits (those go in Stay Current).

2·B · Domain + hosting, in the client's name CLIENT YOU

- The client registers the domain with their own email as owner, or you register it **for** them with their approval and payment at cost, with the receipt saved.
- Hosting: a free static host (e.g. GitHub Pages) usually works for these sites. Create it under an account the **client** controls, or document how it will be transferred to them.
- Record every cost in the Finance tab as Unverified until you confirm it.

2·C · Website content CLIENT BOTS

- From the intake: logo, colours, about text in their words, services/menu with prices, real photos, preferred domain.
- Missing photos? Ask. Stock photos only with the client's explicit approval.

2·D · Build BOTS

Claude builds the site from the matching template with the `H5` handoff (section B of the production instructions): a single fast HTML file, `dir="rtl"`, a `wa.me/966...` button with a prefilled Arabic message, a `tel:` button, an embedded map from their Maps link, meta title/description, and LocalBusiness data using intake facts only. Compress images (under ~300 KB each).

2·E · Preview link BOTS YOU

Publish to a preview address first (not the real domain). Keep the preview link private to the client.

2·F · QC + your review BOTS YOU

QC runs the website section of the QA checklist. Then you run the Get Chosen checklist in Part 4, **on a real phone**.

2·G · Client review round CLIENT YOU

- Send the preview link + a short list of what to check (template 5·3).
- Collect changes in one message; apply what's within the written scope; anything outside it → price it or decline it (your decision).
- Get a written "موافق" on the final preview. Save it.

2·H · Launch YOU

- Connect the domain to the hosting (the host shows the DNS records to add at the registrar).
- Wait for HTTPS (the padlock) to be active. Test both `domain.com` and `www.domain.com`.
- Add the website link to the client's Google Business Profile (Contact → Website).
- Optional, but good: help the owner add the site to Google Search Console with **their** Google account.

2·I · Post-launch test (same day) YOU

- [ ] Open the real domain on iPhone and Android (or two different phones)
- [ ] Tap WhatsApp → opens a chat with the right number and the prefilled message
- [ ] Tap Call → dials the right number
- [ ] Map shows the right place
- [ ] All pages/sections load; no placeholder text anywhere
- [ ] Run Google PageSpeed Insights (mobile) and fix anything red

2·J · Handover YOU BOTS

- Registrar and hosting logins: the client sets or keeps their own passwords. You never store them.
- Send the handover message (template 5·4) with the live link, the QR card, before/after images, and how to request changes.
- Explain renewals: the domain renews yearly, and they pay the registrar directly.

2·K · Close BOTS

As in 1·K: Delivered, Deliverables rows, Day-7 feedback, offer Stay Current once.

2·L · Keep a copy BOTS

Save the final site files in `03-final/` so you can restore or update them under Stay Current.

PART 3

Stay Current · خلّك محدّث

299 SAR / month. Add-on only, after Get Found or Get Chosen. One health check, up to 2 updates, up to 10 reply drafts and a one-page report every month.

Before the first month

- [ ] Client has a delivered Get Found or Get Chosen project (never sell it on its own)
- [ ] Monthly payment confirmed by you before the month's work starts
- [ ] LocalBoost still has Manager access
- [ ] Recurring row created: fee, start date, billing day, counters reset to 0

3.1 The monthly cycle

When	What	Who
Billing day	Confirm payment in the bank → Recurring = **Active**. No payment = pause; no work.	YOU
Days 1–3	**Health check** (list below). Anything wrong → tell the client and propose the fix **before** touching it.	BOTS YOU
Ongoing	**Update requests** (max 2 a month): hours, services, prices, photos, factual corrections. Draft → client OK → apply → log the counter.	CLIENT YOU
Weekly	**New reviews** → Claude drafts replies (max 10 a month) → client approves → you post.	BOTS CLIENT YOU
Before seasons	Ask early for Ramadan/Eid/holiday hours (counts as an update) so special hours go in **before** the date.	BOTS
Days 25–28	**Monthly report**: Claude fills `templates/monthly-report.md` (H9 handoff) → you review → send.	BOTS YOU
5 days before billing	Renewal reminder (template 5·7), after your approval.	BOTS YOU

Health-check list

- [ ] Profile still verified and showing normally
- [ ] Name, category, hours, phone, website unchanged (Google or users can suggest edits; check for any)
- [ ] Upcoming holidays have special hours
- [ ] New photos from others: anything inappropriate → report it
- [ ] New reviews since last month
- [ ] If Get Chosen: site loads, HTTPS works, WhatsApp/call/map work, domain not near expiry

Limits: how to handle them

- 3rd update or 11th reply in a month → tell the client kindly; it waits for next month, or you quote it as extra (your decision).
- Bigger requests (new pages, redesign, ads, social media) → outside Stay Current. Quote separately or decline.
- Numbers in the report come **only** from the owner's dashboard. If not provided → «غير متوفر». Never estimate.
- Cancellation: they can stop before the next month starts. Close the Recurring row; remove manager access if they ask.

PART 3B · STAGE 2 · ORBIT

Shop Check · زيارة التقييم

3,300 SAR, one visit (LB-CHK). Secret-shopper visit, shop appearance, visible money leaks, photo report, score out of 100, top 5 fixes by priority, results session.

What the client receives

- One secret-shopper visit at a normal busy time (the owner knows, the staff don't)
- Shop appearance: storefront, sign, display, menu/prices, staff look
- Visible money leaks (no add-on offered, unclear prices, long waits, missing items)
- A photo report with a score out of 100 (rubric: `templates/shop-check-report.md`)
- Top 5 fixes, ordered by impact and effort
- A results session with the owner

Scope: no accounting, no sales or bank data, no supplier contracts, no profit promises. **Pitch it to** shops that already show well on Maps but have weak service or appearance.

S·A · Agreement + permissions YOU CLIENT

- Written scope and price (offer sheet v2026-11-07). Payment confirmed by you before the visit.
- **Written permission to take photos inside the shop.** No permission → visit with notes only.
- Agree a visit window with the owner. The staff must not know the day.
- `[FOUNDER DECISION]` who pays for any purchase made during the visit.

S·B · Prepare BOTS

- Print the scoring sheet from `templates/shop-check-report.md` .
- Plan the customer journey: approach → enter → ask/order → wait → pay → leave.
- Pick a normal busy time, not opening minute or closing minute.

S·C · The visit (20–40 minutes) YOU

- Behave like a normal customer. Don't reveal who you are.
- Note: greeting (yes/no, how long), cleanliness, display, price clarity, wait time, whether an add-on was offered, how you were thanked.
- Photos, discreetly: storefront, sign, display, menu, shelves. **Never customers' faces.** Staff only if the owner allowed it.
- Write your full notes within 30 minutes of leaving, while it's fresh.

S·D · Report draft BOTS

- Claude drafts the report from your notes and photos using the template: score per category, each finding with a photo or note, money leaks, and the top 5 fixes (problem → why it matters → the fix → effort).
- Any money example says «مثال حسابي، مو وعد», shows a gain bigger than the fee, and never uses the shop's real sales data.

S·E · QC + your review BOTS YOU

QC checks the report; you run the **SX** checklist in Part 4.

S·F · Results session (30–45 min) YOU CLIENT

- Owner only (or whoever the owner chooses). Start with what works.
- Walk through the score and the top 5 fixes. Agree which 1–2 to start with this week.
- The report is about the shop, never about blaming a named staff member.

S·G · Offer Monthly Care YOU

Offer Monthly Care (LB-MC, 1,700/month) once, with no pressure: a monthly visit compared with this one, a check that the fixes held, simple checklists, a short staff session and a monthly report.

S·H · Close BOTS

- Project → Delivered; report PDF in 03-final; consents saved.
- Day 7: one check-in (how are the first fixes going?).

PART 3C · STAGE 2 · ORBIT

Monthly Care · المتابعة الشهرية

1,700 SAR / month (LB-MC). One secret-shopper visit, a fix check, checklists, a staff session and a report every month.

Before the first month

- [ ] A baseline score exists: the Shop Check, or the first month's visit
- [ ] Monthly payment confirmed by you before the month's work starts
- [ ] Cancellation terms recorded. **[FOUNDER DECISION]** Monthly Care cancellation terms
- [ ] Photo permission still valid; Recurring row created
- [ ] Capacity: every client = 1 visit + 1 session + 1 report a month. **[FOUNDER DECISION]** the maximum number of Monthly Care clients

3C.1 The monthly cycle

When	What	Who
Billing day	Confirm payment. No payment = pause, no visit.	YOU
Month 1, week 1	Deliver the four simple checklists (opening, closing, cleaning, welcome) as a printable PDF.	BOTS YOU
Visit	Secret-shopper visit on a **different day and time** each month. Same rubric, same journey.	YOU
Within 3 days	Report: score vs last month, which fixes held or slipped, up to 3 new priorities, photos.	BOTS YOU
Staff session	15–20 minutes, positive and practical, built on the checklists. Praise in public, coach in private; no blaming.	YOU CLIENT
5 days before billing	Renewal reminder (template 5·7 wording, adapted), after your approval.	BOTS YOU

What “good” looks like

The score is compared honestly month to month, even if it drops. Never inflate a score to keep a client.

PART 4

Final review: before you press Deliver

Print these pages. Nothing is handed over until every box for that package is ticked. Any unticked box → fix it, then start the list again.

ALL Every package

- [ ] Payment confirmed by you (Finance tab), and the client's written approval saved in 04-evidence
- [ ] Every fact matches the intake exactly: name, phone, WhatsApp, hours, address, prices, services
- [ ] No fact that isn't in the intake; nothing invented
- [ ] No forbidden claims: "#1", «الأفضل», guarantees, made-up reviews or numbers, Google/Meta affiliation
- [ ] Arabic: correct spelling, natural tone, displays right-to-left properly
- [ ] No other client's data anywhere (names, photos, numbers)
- [ ] Scope = exactly what's in the proposal; nothing missing, no unpaid extras
- [ ] QC returned PASS, recorded in the Deliverables tab

GF Get Found: Google Business Profile

- [ ] Business name = the real sign, with no keywords
- [ ] Primary category correct; secondary categories relevant
- [ ] Pin on the real entrance (checked on the map)
- [ ] Hours correct for all 7 days; special hours on the right dates
- [ ] Phone tested by calling; WhatsApp contact tested
- [ ] Description ≤ 750 chars, Arabic, no URL/phone/price/promo/superlatives
- [ ] Services match the intake (prices only if approved)
- [ ] Photos: real, owner-approved, sharp, in the agreed order
- [ ] Review link opens **this** business's review box; the QR scans on two phones
- [ ] Only approved replies were posted
- [ ] BEFORE and AFTER screenshots saved from the same angles

GC Get Chosen: website (plus everything above)

- [ ] Opens on a real phone: no sideways scrolling, text readable, buttons easy to tap
- [ ] Right-to-left layout correct; English parts (if any) read correctly
- [ ] WhatsApp button → right number + prefilled message; Call button → right number
- [ ] Map embed shows the right place; all links go to the right destinations
- [ ] Images load, are the client's own, and are compressed
- [ ] Page title and description filled in; business data uses intake facts only
- [ ] No placeholder text ([...], lorem ipsum, TODO) anywhere
- [ ] Live on the real domain with HTTPS; www and non-www both work
- [ ] Website link added to the Google Business Profile
- [ ] Domain and hosting registered to the client; costs recorded at cost with receipts

SC Stay Current: monthly report

- [ ] Updates used ≤ 2 and replies ≤ 10, matching the Recurring counters
- [ ] Every posted reply and update had client approval
- [ ] Numbers come from the owner's dashboard, or say «غير متوفر»
- [ ] One page, Arabic, with one practical suggestion for next month
- [ ] Next billing date and amount correct

SX Shop Check / Monthly Care report

- [ ] Score adds up to 100 by the rubric; every deduction has a photo or a clear note
- [ ] No customers' faces; staff appear only with the owner's permission

- [ ] No staff member named in a negative finding
- [ ] Every money example says «مثال حسابي، مو وعد», shows a gain bigger than the fee, and uses no real sales data
- [ ] No accounting, sales or bank data requested or used
- [ ] Top 5 fixes are practical and ordered, each with why and how
- [ ] Prices match offer sheet v2026-11-08 exactly: 3,300 (one visit) and 1,700/month
- [ ] Monthly: comparison with last month is correct; the fixes-held list matches the previous report

PART 5

Message templates

Arabic, ready to send after you approve. Replace the [brackets]. Sign every message «عبدالإله من LocalBoost».

5·1 KICKOFF (AFTER PAYMENT CONFIRMED)

السلام عليكم [الاسم]،
وصلت الدفعة، شكراً لك 🌟 نبدأ الحين على [اسم الباقة] لـ [اسم المحل].
الخطوة الجاية بسيطة:
١. عبّ نموذج المعلومات: [رابط النموذج]
٢. أضف إيميلنا كمدير على ملف قوقل (الطريقة بالخطوات تحت)
أول ما توصلنا المعلومات نجهّز الشغل ونرسله لك تراجعه قبل أي نشر.

5·2 MANAGER INVITE STEPS

عشان نشتغل على ملفك بدون ما تعطينا أي كلمة مرور:
١. افتح ملف محلك في قوقل ماب (أو business.google.com)
٢. الإعدادات ← الأشخاص والوصول ← إضافة
٣. اكتب: [إيميل LocalBoost] واختر «مدير» (مو مالك)
تقدر تشيلنا متى ما بغيت، والملف يبقى باسمك ١٠٠٪.

5·3 REVIEW REQUEST (BEFORE ANYTHING GOES LIVE)

هلا [الاسم]، جهّزنا التعديلات لـ [اسم المحل]:
• التصنيف: [..]
• الساعات + رمضان/العيد: [..]
• الوصف: [النص]
• الخدمات: [..]
• الصور: [عدد] صورة بالترتيب المرفق
• للموقع: رابط المعاينة [الرابط]، جرّبه من جوالك
إذا كل شي تمام رد بـ «موافق»، وإذا فيه تعديل اكتبه لي في رسالة وحدة.

5·4 HANDOVER

السلام عليكم [الاسم]،
خلصنا شغل [اسم المحل] 🎉
اللي تم: [بند ١] · [بند ٢] · [بند ٣]
المرفقات: كرت التقييم QR (اطبعه وحطه عند الكاشير) · صور قبل وبعد · رابط الموقع (لباقة الموقع)
تذكير: كل شي باسمك وملكك، وتعديلات قوقل أحياناً تاخذ أيام لين تظهر.
وإذا تبي نتابع الملف كل شهر، عندنا «خلّك محدّث» بـ 299 ريال شهرياً. وإذا لا، يعطيك العافية وأي وقت تحتاجنا موجودين.

5·5 DAY-7 FEEDBACK (ONCE)

هلا [الاسم]، مر أسبوع على التسليم. كل شي تمام؟ إذا فيه ملاحظة أو شي تبي يتعدل قل لي.

5·6 REPLY DRAFTS FOR APPROVAL (STAY CURRENT)

هلا [الاسم]، وصلت [عدد] تقييمات جديدة هالأسبوع. جهّزنا الردود:
١. [التقييم باختصار] ← الرد: [..]
٢. ..
رد بـ «موافق» وننشرها، أو عدّل اللي تبي.

5·8 SHOP CHECK BOOKING

هلا [الاسم]، تم تأكيد زيارة التقييم لـ [اسم المحل] 🔭
الزيارة بتكون خلال [الفترة]، وفريقك ما يدري عن الموعد عشان نشوف التجربة طبيعية.
نحتاج منك موافقة مكتوبة على التصوير داخل المحل (بدون وجوه الزباين). رد بـ «موافق».

5·9 REPORT READY + RESULTS SESSION

هلا [الاسم]، تقرير زيارة التقييم جاهز ✅
درجة المحل: [x] من 100، ومعها أهم 5 تعديلات.
متى يناسبك نجلس [30–45 دقيقة] نشرح النتائج؟

5·10 MONTHLY CARE OFFER (ONCE)

إذا حاب نتابع معك كل شهر ونتأكد إن التعديلات ثابتة: «المتابعة الشهرية» بـ 1,700 ريال شهرياً.
زيارة سرّية كل شهر، ونتأكد إن التعديلات ثابتة، وجلسة قصيرة مع الفريق، وتقرير شهري.

5·11 MONTHLY CARE REPORT

هلا [الاسم]، تقرير المتابعة لشهر [..] جاهز:
• الدرجة: [x] من 100 (الشهر الماضي [y])
• التعديلات الثابتة: [..]
• نشتغل عليها الشهر الجاي: [..]
وموعد جلسة الفريق الجاية: [..]

5·7 RENEWAL REMINDER

هلا [الاسم]، تذكير بسيط: اشتراك «خلّك محدّث» لـ [اسم المحل] يتجدد بتاريخ [..] بمبلغ 299 ريال.
إذا تبي توقفه، قل لي قبل التاريخ وما فيه أي مشكلة.

PART 6

When things go wrong

Fast answers to the problems you'll actually meet. When in doubt: pause, tell the client honestly, decide yourself. Bots escalate, they don't improvise.

Problem	What to do
Owner can't find how to add a Manager	Send template 5·2 again with screenshots; offer a 5-minute call or a visit. Never ask for their password instead.
Profile isn't claimed or verified	Only the owner can verify. Pause the project, explain why, and resume after verification. The target date moves; tell them in writing.
Profile is suspended	Stop. Don't create a new listing. The owner files Google's reinstatement request with real proof of the business. Escalate to you.
Edit stuck "under review" or rejected	Wait 2–3 days. Check the edit follows Google's rules (real name, real address, no keywords). Resubmit once, then tell the client honestly.
Duplicate listings for the same shop	Note it in the audit. The owner can request removal/merge through Google support. Don't delete anything yourself.
Client asks for guaranteed ranking or fake reviews	Politely refuse (FAQ wording in 01-offer.md). It's both a promise you can't keep and against Google's rules.
Client wants a discount or extra scope	Bots never agree. You decide: price it, swap it for something in scope, or decline.
A wave of negative or fake reviews	Don't argue publicly. Draft calm replies for approval, and the owner reports policy-violating reviews through Google. Never post counter-reviews.
Client unhappy after delivery	Listen and compare with the written scope. Fix anything that's in scope quickly; for the rest, explain kindly. Refunds follow the policy: you decide.
Payment not received	No work starts or continues. One polite reminder, then pause. Never mark it paid from a screenshot.
Owner refuses photo permission (Shop Check)	Do the visit with written notes only, and tell the owner the report will have fewer images. Never photograph secretly.
Staff recognised you during the visit	Note it; don't score the affected items. Repeat the visit another day (your decision on cost).
Owner wants names and blame in the report	Keep the written report about the shop. Discuss individuals privately with the owner only.
Owner offers to show sales numbers	Politely decline: it's out of scope. Use only what a customer can see.
Client stops replying mid-project	Max 3 reminders, 2 working days apart. Then Project → On hold (client unresponsive), and one final message saying you're ready when they are.

The one-line test before anything goes out

"Is it **true**, **approved**, **paid for**, **in scope**, and **logged**?" If any answer is no, it doesn't go out.
